

U.S. Postal Service: Challenges to Sustaining Performance Improvements Remain Formidable on the Brink of the 21st Century: T-Ggd-00-2

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 40 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Pursuant to a congressional request, GAO provided information on the Department of Energys (DOE) efforts to improve the storage of spent nuclear fuel from its nuclear reactors at DOEs Hanford Site in Washington State, focusing on: (1) its status; (2) what problems might affect achieving cost and schedule estimates; and (3) whether changes have been sufficient to address management weaknesses. GAO noted that: (1) although DOE has increased confidence that the project eventually will begin to remove fuel from the water storage basins, uncertainty remains over when the project will be finished and how much it will cost; (2) completion is scheduled for July 2007 at a cost of 1. 7 billion--about 6 years and 1 billion beyond the original estimates made in 1995; (3) however, the new completion date includes 133. 5 million and about 2 years for work activities not included in the original estimate; (4) compared with conditions that GAO reported on in May of last year, the amount of progress is substantial, with considerable construction completed and equipment installation under way; (5) since the schedule was established...
