C. Pickering, at the Lowell Institute. --In the lecture, reference was made to the attempts to combine the wave theory of light and electricity by supposing that the vibrations of the ether which produce the phenomena of electricity are longitudinal, resembling those of sound, while the phenomena of light are produced by transversal vibrations of the same medium. The theory the lecturer advanced, though only provisionally, as the one that seems to answer all the requirements of the case better than any other, is that of a single fluid, --that this single fluid is the ether by whose vibrations light is produced; a body being charged positively when it contains an excess of ether, and negatively when the...
