In our century, however, on the grounds of many experiments with light beams and particles moving at high speeds, the situation arose that the old conceptions for space and time were considered as corresponding only approximately to reality, i.e., when the velocities of the particles are low enough with respect to light velocity. A new theory, whose fathers are Einstein and Minkowski, allowed the explanation of all high-velocity experiments, but this theory led to tragic results: the sound absolute Newtonian conceptions for space and time have been replaced by new ones, generally called relative, which contradict the healthy human mind drastically.
